ACCURATE, RUGGED AND "SMART" GAS DETECTORS FOR UTILITIES

The all-weather, Gas-Ranger™ detectors, specifically designed for gas and other utility personnel, can be used to track gas leaks, bar-hole, and to monitor ambient air for natural gas, carbon monoxide, hydrogen sulfide, and oxygen. Design features include:

- ◆ Leak tracking with a fast, sensitive scale (50 ppm)
- ◆ Built-in high speed, high capacity pump (2 L/min.)
- ◆ Fixed time bar holing (10 to 90 sec, user selected)
- ◆ Automatic display of peak and sustained gas (0-100%)

Gas-Ranger detectors are easy to use and to maintain:

- ◆ Large, bright LED display readable at 20 feet
- ◆ Easy to use single switch design
- ◆ Operational self-tests; field serviceable
- ◆ Tough, watertight, Xenoy alloy case with O-ring seal

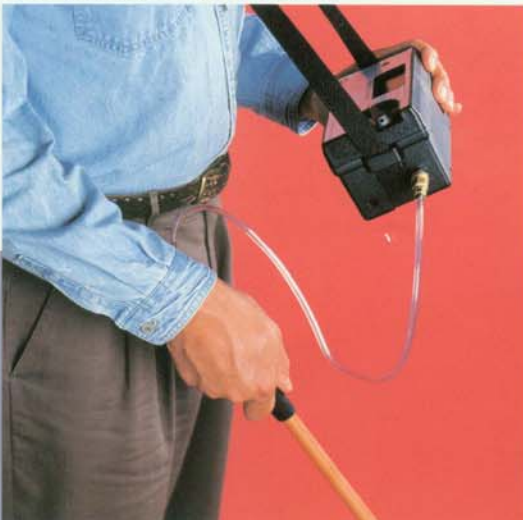

EXTENDED LIMITED WARRANTY

Detectors are warranted for one year, sensors for three, and the electronics for the life of the instrument.

DOCKING CALIBRATION (D-CAL™)

An optional system for large users offers calibration at docking stations. Calibration data, sensor sensitivities, and usage time are centrally available to help manage risk. Faxes reminding users of due or overdue calibrations are sent automatically.

The TRACK GAS scale allows the Gas-Ranger to detect leaks as small as 50 ppm.

Gas-Ranger's high speed internal pump is ideal for leak classification.

GAS-RANGER MODELS

- RGI-201 Dual Scale Natural Gas
- RGC-301 Dual Scale Natural Gas and CO
- RGO-321 Dual Scale Natural Gas and O₂
- RGA-411 Dual Scale Natural Gas, CO, and O₂
- RGA-611 Dual Scale Natural Gas, CO, H₂S, and O₂

All gases are monitored continuously and the unit alerts audibly and visually when one or more gases are outside their alarm limits.

Bar-hole gas measurements are made easily and consistently with the detector's built-in pump, automatic timer and memory.

All models have a TRACK GAS scale for quick leak tracking sensitive to 0.005% GAS (0.1% LEL or 50 ppm)

CARRY A GAS-RANGER ON THE JOB

and see how your company can benefit. Call Bascom-Turner Instruments at 1-800-225-3298.

BASCOM-TURNER INSTRUMENTS, INC.
Instruments for Industry Since 1980
Made in U.S.A.

After a preset time, the Gas-Ranger displays peak and sustained bar-hole gas readings.
