

Pipe Wrenches (Heavy Duty)

The most popular pipe wrench style. High-tensile ductile iron handle and hardened, alloy steel parts are designed to withstand the heaviest demands. Offset wrenches have similar construction and provide longer swing and better access to hard-to-reach places.

Meets Federal Specifications GGG-W-00651e and Amendment 1; Type II Class A Fig. 3 and Type VI Fig. 8

WHY REED? No minimum order quantities on wrenches or parts!

Pipe Wrench Parts

Forged alloy steel replacement parts meet the most demanding applications. These high quality components are direct replacement parts for the RIDGID® brand 60 pipe wrench. Jaw teeth are hardened to meet Federal Specification GGG-W-651E Type II Class A. Heel jaw fits both hook and handle.

Cat. No.	Item Code	Description	Replaces RIDGID® Part No.	Weight	
				lbs	kg
RW60B	92169	Hook Jaw Assembly	31770	12.5	5.7
RW60C	92179	Heel Jaw & Pin	31775	1.2	0.5

Reed pipe wrench parts are interchangeable with the most major, heavy duty U.S. brands including RIDGID® and other popular brands of straight handled wrenches and 45° offset wrenches (end wrenches) from 6" - 60". Parts available include hook jaw, heel jaw and pin, coil and flat spring, and nut. Contact Reed with additional conversion or parts questions.

Aluminum Pipe Wrenches (Heavy Duty)

Light and strong, the titanium-aluminum alloy handle is heat treated for maximum strength. These wrenches exceed U.S. Government specifications for ductile iron wrenches, but weigh about half as much and carry the same Reed Lifetime Warranty. Offset wrenches have similar construction with longer swing for hard-to-reach places.
